Aman Singh Chauhan

MBA Business Analytics Candidate | Data Analytics | Python | SQL | Power BI
Gwalior, Madhya Pradesh, India | +91 9302973976 | amansingh82338@gmail.com | GitHub: amansingh82338

SUMMARY

Entry-level MBA Business Analytics candidate with practical experience in data analytics, dashboard development, predictive modeling, and statistical analysis using Python, SQL, Power BI, and Excel. Completed a Data Analytics internship and built end-to-end analytics and machine learning projects. BBA in Human Resources adds a business and people-focused perspective to analytical problem solving.

EDUCATION

Master of Business Administration (MBA), Business Analytics | 2025 – 2027 (Expected)
Prestige Institute of Management and Research, Gwalior (Jiwaji University)
Coursework: Business Analytics, Predictive Modeling, Data Visualization, Strategic Management

Bachelor of Business Administration (BBA), Human Resources | 2022 – 2025
Prestige Institute of Management and Research, Gwalior (Jiwaji University)
Coursework: Human Resource Management, Organizational Behavior, Business Statistics, Marketing

EXPERIENCE

Data Analytics Intern | Codtech IT Solutions Private Limited | Remote | June 2026 – July 2026

- Completed an internship focused on data manipulation, data analysis, and predictive modeling.
- Developed four end-to-end analytics projects covering predictive forecasting, A/B testing, and diagnostic analysis.
- Transformed datasets, identified patterns, and generated business-oriented insights.
- Completed all assigned tasks and received a certificate of successful completion.

Marketing Management Intern | Immensphere (via Teachnook) | Remote | May 2023 – June 2023

- Analyzed market trends and consumer behavior to support marketing initiatives and campaigns.
- Applied business and marketing concepts to practical scenarios and collaborated on assigned activities.

PROJECTS

Uber Ride & Revenue Analytics Dashboard
Technologies: Power BI

- Developed an interactive dashboard analyzing ride bookings, revenue, trip distance, cancellations, vehicle-type performance, locations, and customer/driver ratings.
- Created KPI-driven visualizations for monthly revenue, completed bookings, vehicle performance, and ride trends.
- Presented operational and financial metrics in an executive-style dashboard for business analysis.

Superstore Sales & Profit Analysis Dashboard
Technologies: Power BI

- Built an executive dashboard analyzing sales, revenue, profit, profit margin, customer performance, and regional trends.
- Analyzed monthly, quarterly, regional, state-level, and customer-level performance using interactive visualizations.
- Designed KPI cards and comparative charts to support data-driven decision making.

Predictive Retail Sales Forecast
Technologies: Python, Pandas, Scikit-learn, Streamlit

- Analyzed historical retail sales data to identify trends and develop a sales forecasting solution.
- Built and evaluated a machine learning model for sales prediction.
- Deployed the forecasting solution as an interactive Streamlit application.

TECHNICAL SKILLS

Programming & Querying: Python, SQL, R
Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Statistical Analysis
Machine Learning: Scikit-learn, Predictive Modeling, Classification, Forecasting
Business Intelligence: Power BI, Tableau, Excel
Visualization: Matplotlib, Seaborn, Power BI
Tools: Streamlit, Git, GitHub, Jupyter

CERTIFICATIONS

- Data Manipulation in R, CodeSignal (2026)
- Introduction to Data Science with Python, CodeSignal (2025)
- Microsoft Excel: Beginner to Advanced, Udemy (2025)
- Data Science & Analytics, HP LIFE Foundation (2024)
- Employability Skills, JobReady (113 Hours), Wadhwani Foundation (2024)
